WHAT'S BEEN HAPPENING

During the first two weeks of term, the children were given the opportunity to plan and brainstorm their own clubs based on their interests and strengths. The engagement has been excellent, with students rotating between different clubs each day depending on their interests. These sessions have included hands-on creative arts, Lego construction, and gardening. We would love input from families about their home recipes and languages for Friday's culture club. Thursday's gardening club would hugely benefit from some community help and potting soil donations! We ended Week 3 with an exciting Halloween celebration on Friday, where children dressed up, decorated the space with spooky crafts, and took part in themed games and treats. Thank you to all families who helped with costumes and spirit. Educators even dressed up for the party. It was a fantastic way to end the week!
